point of **28°C**

COOLING NECK RING

No messy, wet condensation
or water droplets.

Helps to keep you cool
for up to 2 hours.

Reusable personal chilling
and cooling accessory

Around 17 X 19CM

COOLING NECK RING

INSTRUCTIONS FOR USE:

INTCO Cooling Neck Ring uses an innovative gel filling that stays cool even at room temperature. With a freezing point of 28°C, it 'refreezes' at normal room temperatures so you don't need to keep putting it back in the fridge or freezer. That means you can take the Cooling Neck Ring with you wherever you go and not worry about it warming up. For quicker turnaround times between uses, or for a rapid cooling effect, INTCO Neck Ring can also be placed in a fridge or freezer for 10-15mins and stays cool for up to 2 hours. Our amazing cooling gel filling also stays dry as it thaws, so there are no messy, wet condensation or water droplets.

CAUTION:

- Avoid Sharp Objects.
- Avoid open flames and excessive heat.
- If your skin is exposed to PCM gel (refrigerant). Clean the affected area with soap and water. If you have eczema (atopic dermatitis) see your physician if irritation persists.
- Do not swallow the contents (if swallowed, report to a hospital immediately and consult your physician)
- Use only for original purpose.
